

1. Chinese room
 - (a) Programs and multiple implementability.
 - (b) Systems reply: it's not the man in the room, but the *system* that understands Chinese.
 - (c) Robot reply: one could add 'interaction with the world' to the machine.
2. Dualism
 - (a) Substance dualism (Descartes) vs. Property dualism.
 - (b) Causal closure of the physical (leads to epiphenomenalism).
3. Behaviorism (logical and methodological)
4. Identity theory (type and token)
 - (a) Place and Smart
 - (b) Nomological danglers
 - (c) Kripke, rigid designators, etc.
 - Heat vs. sensation of heat.
 - Contrast with pain (pain = sensation of pain).
5. Functionalism
 - (a) Armstrong and Putnam.
 - (b) Block and the Chinese Nation (homunculi headed robots).
 - (c) Role functionalism vs. realizer functionalism.
 - (d) Lewis on mad pain and martian pain.
 - (e) Contingent identity statements (*because* no rigid designators!).
6. Intentionality and externalism (meaning and thoughts)
 - (a) Putnam and meaning externalism.
 - (b) Burge, social externalism and thought externalism.
 - (c) Chalmers and Clark.
7. Privileged access and externalism
 - (a) Metaphysical vs. conceptual implication/entailment.
 - (b) Brueckner: what is E?
8. Nagel
9. Knowledge argument
 - (a) Jackson
 - (b) Lewis on the HPI vs. the ability Hypothesis.

10. Chalmers
 - (a) The ABC and DEF positions. Main objections to each, etc.
11. Panprotopsychism
 - (a) The inconsistent tetrad.
 - (b) T-physicalism vs. o-physicalism.
12. McGinn's mysterianism
 - (a) Cognitive closure.
 - (b) What about psychophysical explananda? (Alex)
13. Tye on Qualia and qualia.
